BPA Funding for Habitat Restoration by Activity Type (2007-2008)

BPA 2008 Region-wide Habitat Status

Project-type	Performance indicator	2000-2008 Average
Instream habitat projects	2,000 stream miles treated	1,850
Wetland habitat projects	8,445 acres created 20,100 acres treated 9,335 acres restored	7,500 16,345 8,250
Estuarine habitat projects	1,045 acres created 3,560 acres treated 2,845 acres restored	900 2,980 1,975
Land acquisition projects	132,00 acres acquired/protected 390 stream bank miles acquired protected	145,000 410
Riparian habitat projects	4,125 stream miles treated 25,600 acres treated	5,010 23,390
Upland habitat projects	410,360 acres treated 45,980 acres restored	345,500 60,790
Fish passage projects	3,845 barriers removed 7,900 stream miles accessed 375 fish screens installed	2,230 6,650 285
Watershed planning and assessment projects		
Research, monitoring, and evaluation projects	60,000 miles of streams monitored 135 assessments completed	58,350 105
Water acquisition projects	3,060 acre-foot of water restored to streams	2,450
Road projects	350 miles corrected	220

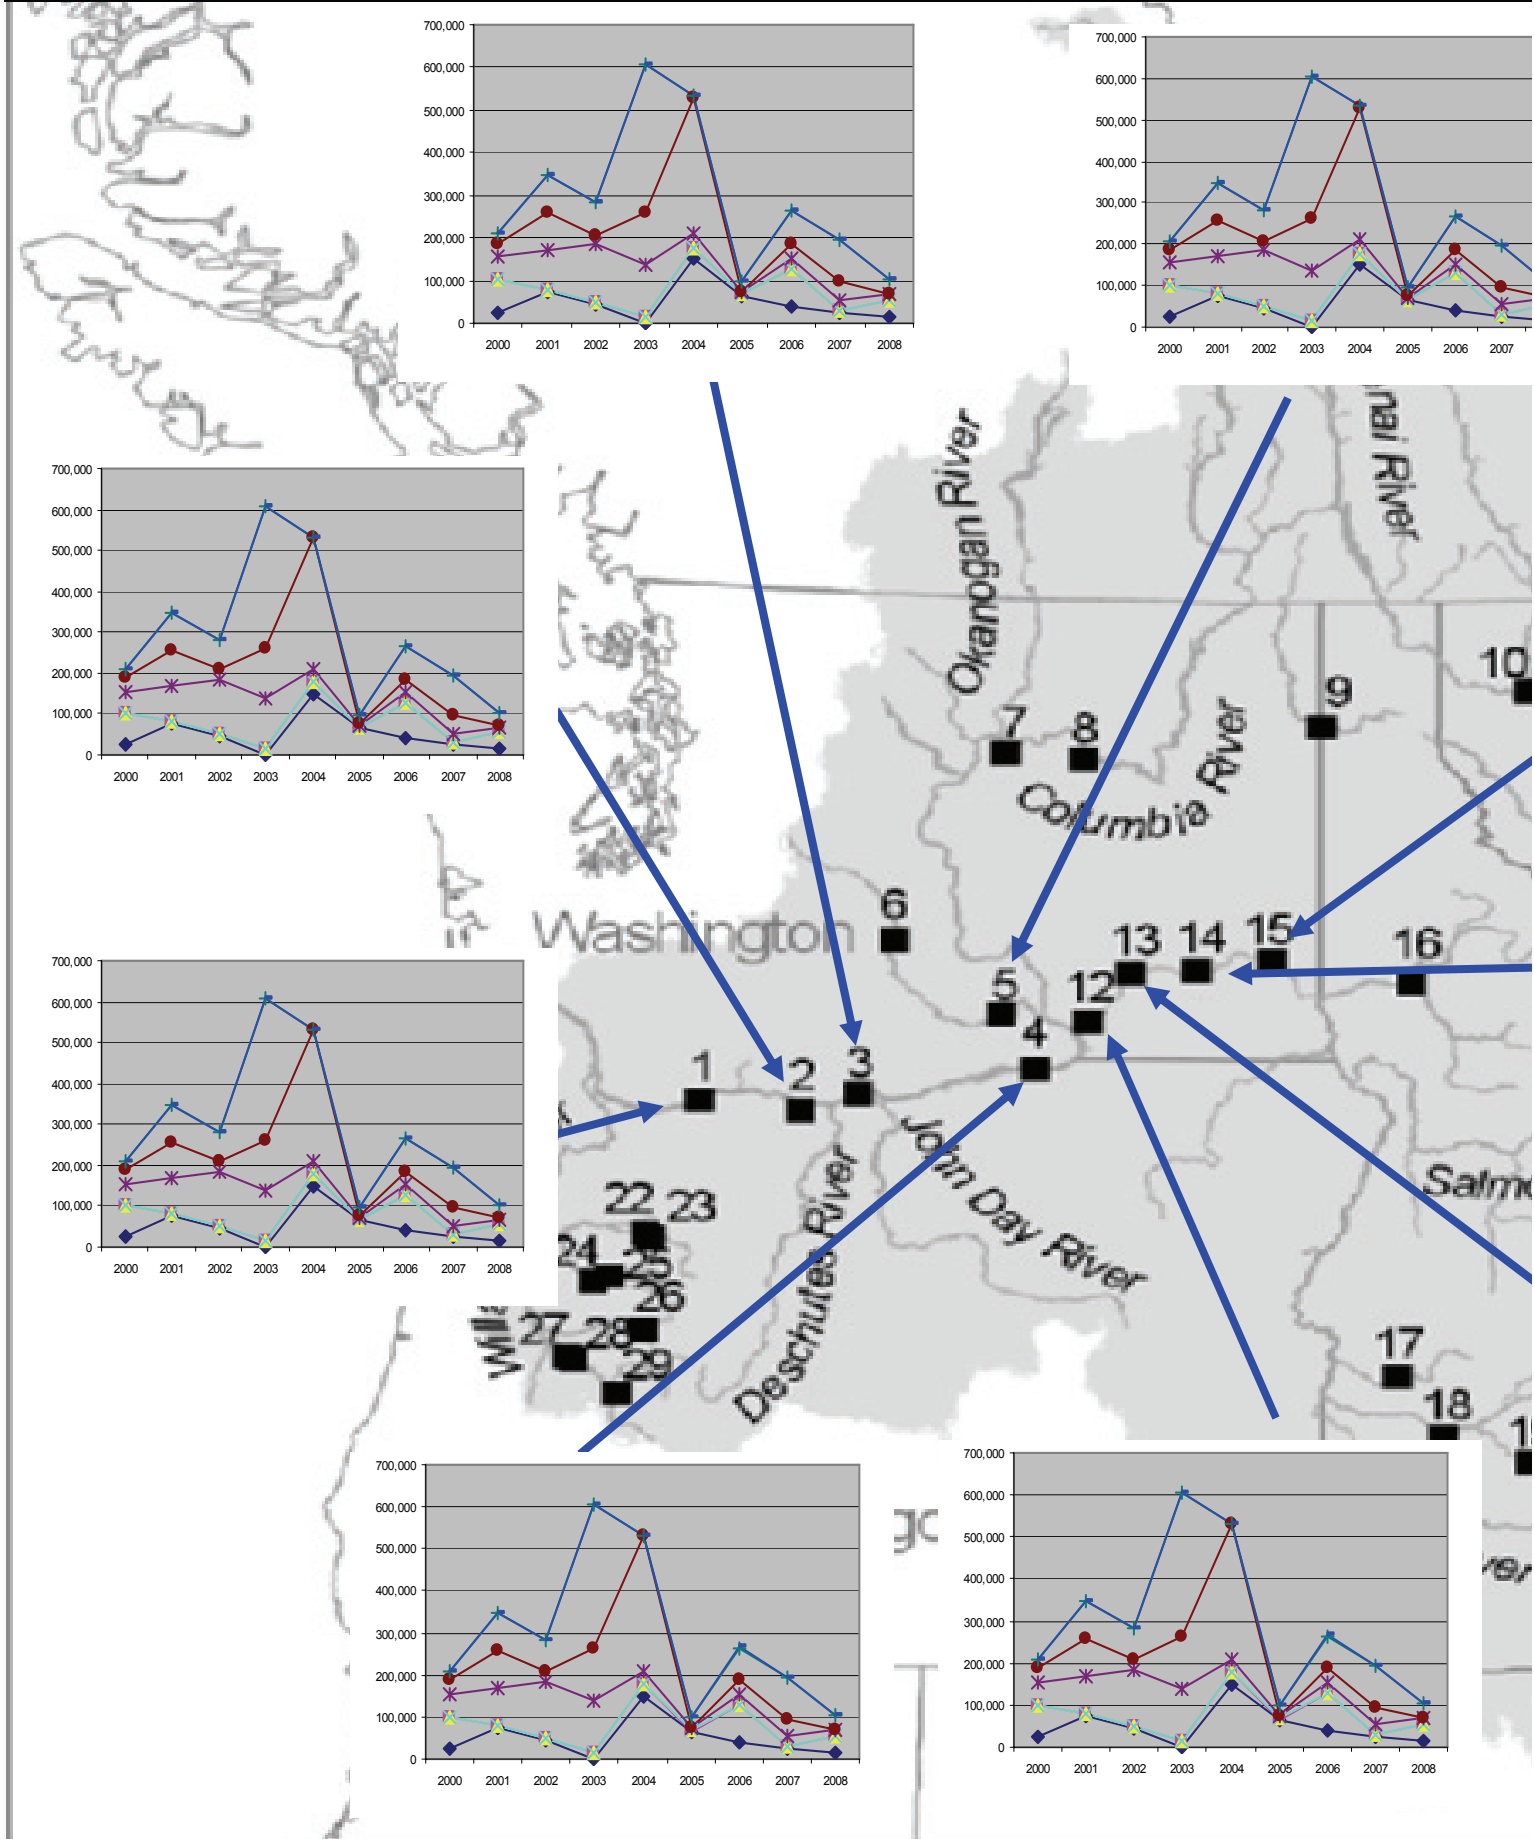

Status and Recovery of ESA-Listed Salmon and Steelhead

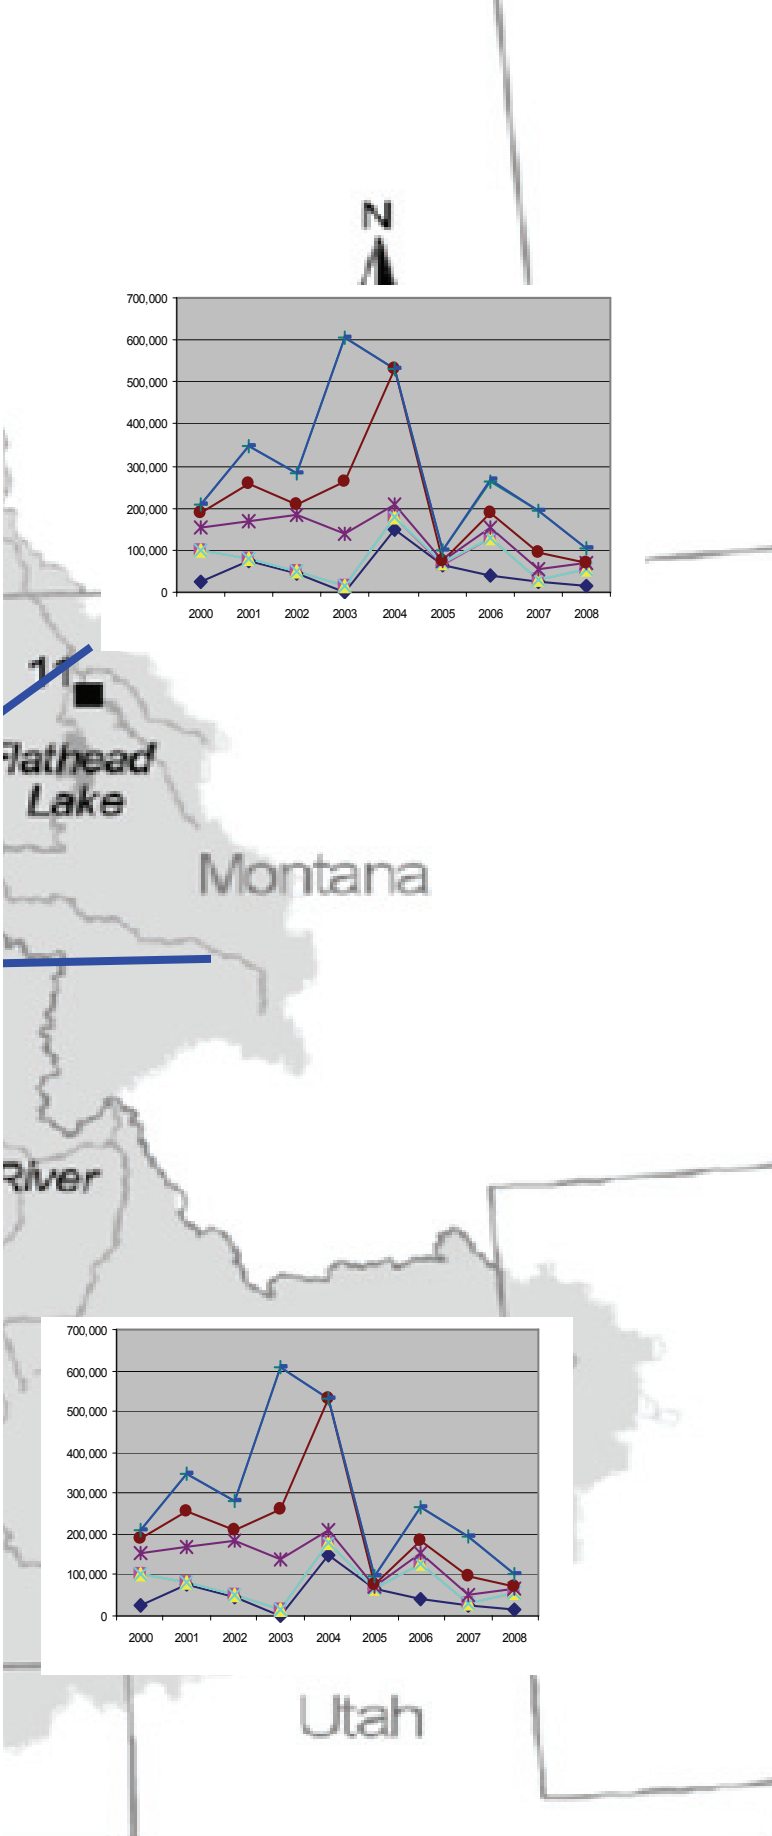

Species	ESU/DPS	Federal Designation (year listed)	Estimated Average Historical Abundance (circa 1900)	2007 Adult Returns (% hatchery and wild)
Chum Salmon	Columbia River	Threatened (1999)		
Chinook Salmon	Snake River Fall	Threatened (1992)		
	Snake River Spring/Summer	Threatened (1992)		
	Lower Columbia River	Threatened (1999)		
	Upper Columbia River Spring	Endangered (1999)		
	Upper Willamette River	Threatened (1999)		
Steelhead	Snake River Basin	Threatened (1997)		
	Lower Columbia River	Threatened (1998)		
	Middle Columbia River	Threatened (1999)		
	Upper Columbia River	Endangered (1997)		
	Upper Willamette River	Threatened (1999)		
Sockeye Salmon	Snake River	Endangered (1991)		
Coho	Lower Columbia River	Threatened (2005)

Columbia Gorge

The Columbia Gorge Province is bounded by Bonneville Lock and Dam at river mile 145 and The Dalles Dam at river mile 191 on the Columbia River, and encompasses an area of 3,293 square miles. Subbasins in the Columbia Gorge Province include the Big White Salmon River, Columbia Gorge Mainstem (i.e., Bonneville Reservoir), Hood, Fifteenmile, Klickitat, Little White Salmon, and Wind. Chinook (spring and fall), chum, steelhead (summer and winter), and bull trout populations throughout the province are listed under the federal Endangered Species Act. This province is characterized by a complex geologic structure and vegetation pattern. Fed by glaciers in the Oregon and Washington Cascades, the rivers in the province flow from high elevation coniferous forests and transition through fruit orchards and other irrigated agriculture in the lowlands before entering the Columbia River. Forestry, ranching, agriculture, orchards, and tourism are significant factors in the economy of communities in the province.
