Draft Agenda

ITEM 1: Review Agenda

ITEM 2: Columbia Basin White Sturgeon Monitoring, Evaluation, Research, and Implementation Strategy: Background

The NPCC is in the process of finalizing their draft *Columbia River Basin Monitoring, Evaluation, Research, and Reporting (MERR) Plan*. The MERR Plan consists of the following sections: 1) Strategic Plan (provides policy guidance), 2) Implementation Framework (guides development of Implementation Strategies), and 3) Implementation Strategies (specific guidance for what and how RME and reporting will be conducted).

Implementation Strategies are to be collaboratively developed with the region's experts and managers, and are to be appended to the MERR Plan. The strategies should assure adequate coordination at the subbasin and basin-wide level to facilitate aggregation of data for assessing and reporting Program progress.

In developing its annual work plan, the CBFWA's Members anticipated this opportunity. Subsequently, the Members directed the Resident Fish Advisory Committee to facilitate the development of implementation strategies for monitoring white sturgeon management units throughout the Columbia River Basin. Neil Ward will provide an overview of the CBFWA's Members directive as well as the opportunities that exist through the NPCC's draft MERR Plan.

ITEM 3: Developing a Columbia Basin White Sturgeon Monitoring, Evaluation, Research, and Implementation Strategy: Goals, Objectives, Tasks and Products

During the March 1, 2010 Ad hoc White Sturgeon Workgroup Meeting, a sub-committee was formed to develop a draft process and template to aid sub-regional workgroups in the development of white sturgeon implementation strategies. The proposed procedure and a partially completed template for Zone 6 will be provided as an example of the types of information that should be included in implementation strategy.

ITEM 4: Next Meeting
