

2009 Fish and Wildlife Program

“...shape the measures recommended for all areas of the Program into multi-year action plans similar to those implementation plans in the 2008 Biological Opinion and the Accords.

The Council will then work with Bonneville and relevant entities to estimate multi-year implementation budgets and secure funding commitments that ensure adequate funding for these action plans”.

2009 Fish and Wildlife Program

Primary elements of multi-year action plans include:

- Ongoing and new proposed actions
- Expected benefits
- Sequence of work on an annual basis
- Prioritization of work
- Monitoring and evaluation as appropriate
- Estimated budget

The Council encourages the participants in each subbasin to complete the multi-year action plans prior to the subbasin management plan updates so they can be considered for incorporation into the subbasin management plans.

Envision three reports that could be developed into action plans

1. Brief subbasin overview
2. Limiting factor – action assessment
- 3*. List of actions, budget

Report 2. Limiting factor –action assessment concept

LF 1 Action a
 Action b
 Action c
 Action d

LF 2 Action a
 Action e

LF 3 -

? Action f
 Action g

Report 3. List of actions, budgets

| Action | Ref or proj # | MOA | RPA | LF | FY09 \$ | FY10 \$ | FY11 \$ |
|-----------|------------------|-----|-----|----|------------|------------|------------|
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
