State Listed Wildlife Species

APPENDIX F

State Listed Wildlife Species

GENERAL SPECIES AND HABITAT LIST FOR OKANOGAN COUNTY
 Report Date March 16, 2001

These products only include information that Washington Department of Fish and Wildlife (WDFW) maintains in a computer database. They are not an attempt to provide you with an official agency response as to the impacts of your project on fish and wildlife, nor are they designed to provide you with guidance on interpreting this information and determining how to proceed in consideration of fish and wildlife. These products only document the location of important fish and wildlife resources to the best of our knowledge. It is important to note that priority habitats or species may occur on the ground in areas not currently known to WDFW biologists, or in areas for which comprehensive surveys have not been conducted. Site-specific surveys are frequently necessary to rule out the presence of priority habitats and species.

This report may contain species and habitat occurrences that are not considered priority. See the Priority Habitats and Species List (available upon request) published by WDFW for details on which species and habitats are considered priority.

PRIORITY ANADROMOUS AND RESIDENT FISH PRESENCE REPORT FROM THE STREAMNET DATABASES FOR OKANOGAN COUNTY
Date of report: March 16, 2001

The fish information in this report only includes data that the Washington Department of Fish and Wildlife (WDFW) maintains in a central database. This information only documents the location of important fish resources to the best of our knowledge. It is not a complete inventory of the fish species in the state. Fish are identified as priority by WDFW if they meet 1 of 3 criterion as listed in the Priority Habitats and Species List.

For questions on the StreamNet Database, please contact Martin Hudson at (360) 902 2487.
